

RFGEN VERSION 4

**PRESENTED BY: ROBERT BRICE
EXECUTIVE VICE PRESIDENT
DATAMAX SOFTWARE GROUP, INC.**

AGENDA

- Company Introduction
- Mobile Development Studio
- Mobile Framework
- Speech Recognition
- JD Edwards Solution Set Enhancements
- Hands-on demonstration
- Attendee questions

RFGEN SOFTWARE

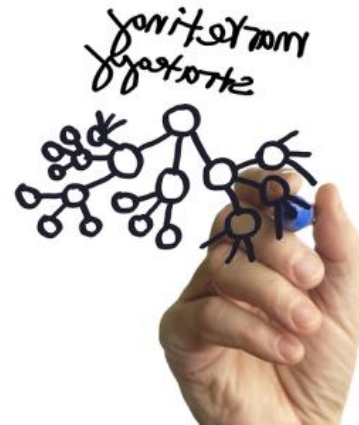

THE DATA CAPTURE EXPERTS

- 25 years of continuous operation
 - Headquarters in El Dorado Hills, CA
 - Regional office in Austin, TX
 - 100% focused on data collection
 - Strong annual investment in R&D
 - Built around a core group of senior level consultants
-
- Worldwide installations (2,500+)
 - Worldwide partner network (125+)
 - Certified consultant network (500+)

CORE COMPETENCIES

- Senior level consulting expertise in JD Edwards business processes
- Extensive knowledge of industry specific best practices for automated data capture solutions
- Real world, hands-on experience with multiple data capture technologies and process workflows

WITH RFGEN, YOU'RE IN GOOD COMPANY

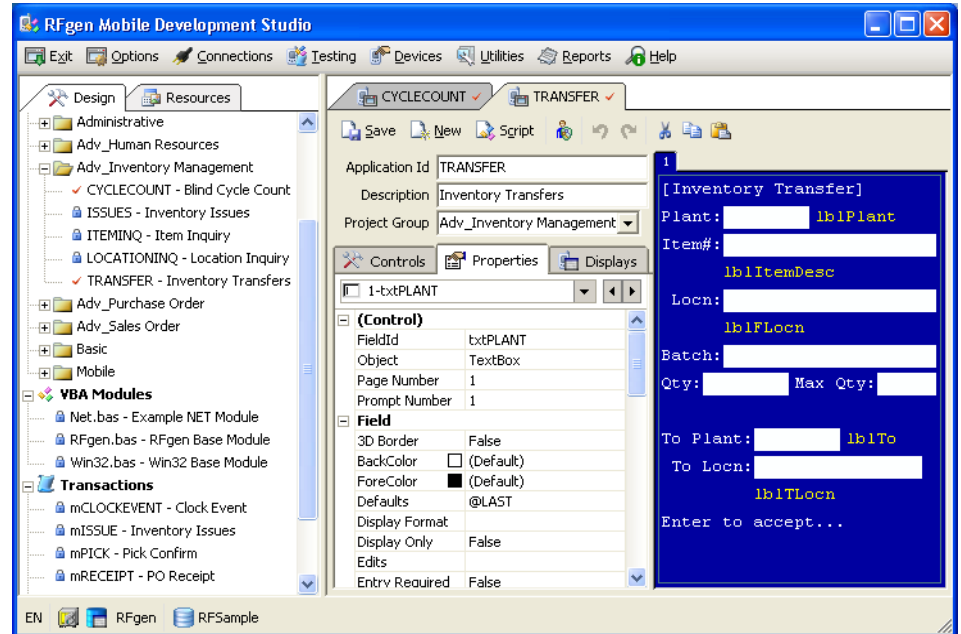

Perfection for Life

RFGEN VERSION 4

- Released to production in April 2010
- Currently deployed at numerous locations in the U.S., Europe and Asia / Pacific
- Designed to give additional value to existing and new customers
- Delivers new features and utilities that...
 - Minimize IT support requirements
 - Maximize system performance
 - Provide the highest level of data reliability
 - Significantly increase developer productivity

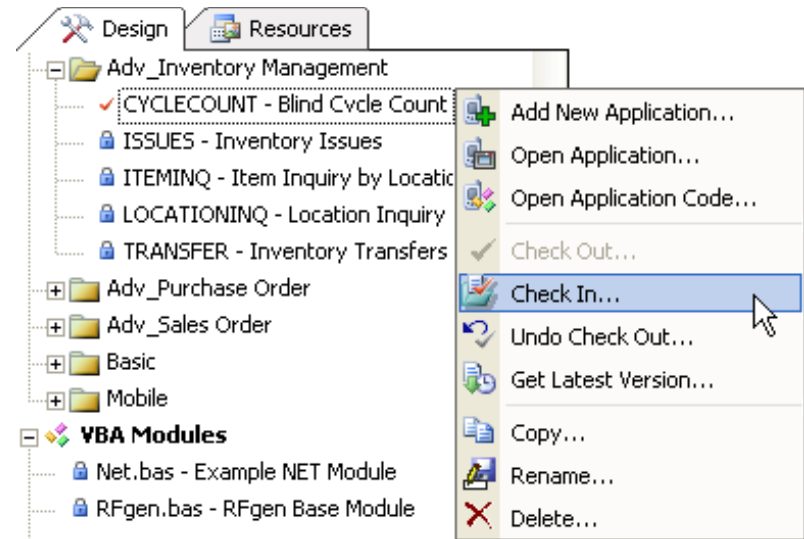

MOBILE DEVELOPMENT STUDIO VERSION 4

Software
RFgen

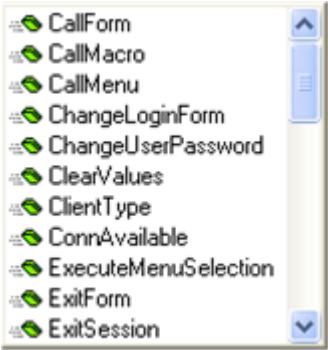

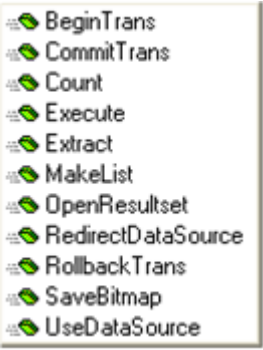

MICROSOFT SOURCE SAFE INTEGRATION

- Microsoft Visual SourceSafe Integration
- Check-in, check-out, and rollback
- Facilitate multi-developer scenarios
- Version controlled updates

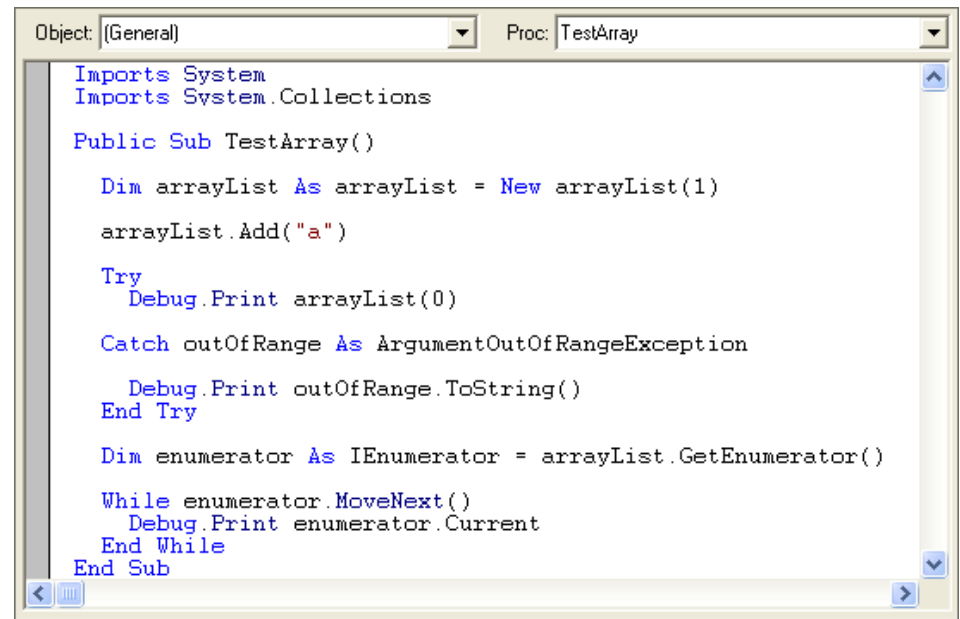

OBJECT ORIENTED VBA SCRIPTING

- Easy access to the RFgen Mobile Framework
- Drop-down lists of available methods
- Built-in intellisense
- Code auto-completion

App.	DB.
	
Related methods for the embedded Application object are displayed.	Related methods for the Data Connection object are displayed.

SUPPORT FOR VBA.NET INTEGRATION

- Develop modules using VBA.Net syntax
- Access .Net module functions from VBA classic code
- Import .Net assemblies and libraries

The screenshot shows a VBA code editor window with the following code:

```
Object: [General] Proc: TestArray

Imports System
Imports System.Collections

Public Sub TestArray()

    Dim arrayList As ArrayList = New ArrayList(1)
    arrayList.Add("a")

    Try
        Debug.Print arrayList(0)

    Catch outOfRange As ArgumentOutOfRangeException

        Debug.Print outOfRange.ToString()
    End Try

    Dim enumerator As IEnumerator = arrayList.GetEnumerator()

    While enumerator.MoveNext()
        Debug.Print enumerator.Current
    End While
End Sub
```

RFGEN MOBILE FRAMEWORK

- Provides certified connectivity to JD Edwards
 - **Version Independent**
 - **Enterprise One (Xe, E1 8.x, E1 9.x)**
 - **World (A7.3x, A8.x, A9.x)**
- Supports multiple data capture scenarios
 - **Real time**
 - **Mobile**
 - **Roaming**

RFgen Software

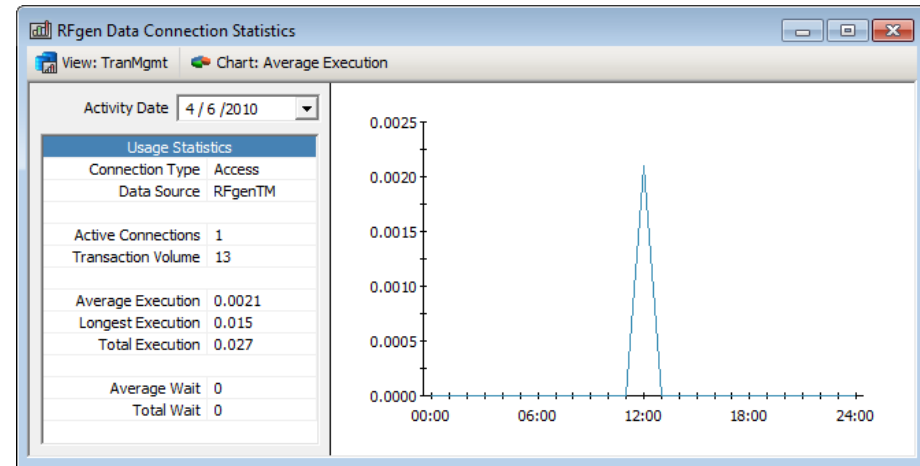

RFGEN CNC – CLIENT NODE CONTROL

- RFgen CNC simplifies the management process for your Windows / CE based devices
- View / Interact with all CNC enabled devices on your LAN / WAN
- Auto upgrade your RFgen clients – anywhere
- Deploy mobile application updates
- Install other packages / updates on your devices

SYSTEM TUNING AND TRACKING

- RFgen v4 is designed to help fine-tune your installation and maximize your system's responsiveness
- Performance monitoring of any data connection
- Identify and trap long running SQL or BSFN updates
- Provide graphical reporting on system performance
- Embedded transaction auditing

SIMPLIFIED ADMINISTRATION

- RFgen includes a number of features and utilities that simplify administration for multi-site implementations
- Auto synchronization of remote RFgen databases
- Load balancing capability to help maximize performance
- Extend tasks to power users, such as...
 - Manage user profiles in application
 - Manage failed transactions in application

VOICE TECHNOLOGY

Voice has a 20-year track record of documented success in improving productivity and performance while achieving rapid ROI.

Supply Chain Digest, April 2008

The benefits of using voice recognition for picking orders are well proven . . . 15%+ productivity gains over handheld and truck mounted RF devices.

Manufacturing & Logistics IT

Software
RFgen

RFGEN FOR VOCOLLECT

- Middleware / system bridge
- Rapid implementation
- Completely configurable and adaptable
- Supports countless distribution center processes
- Available in over 20 languages
- Real-time interaction – not batch
- Equal performance in one or multiple locations
- Proven reliable and durable hardware

RFGEN EMBEDDED VOICE

- Based on Nuance Technology
- Requires Windows CE v4.0+
- Hardware independent
- Supports multiple languages
- Easy to implement
- Recognize speech without word training
- Combine keyboard, scanning and voice
- Voice direct existing applications

RFGEN SOLUTION SETS

- Standard Inventory
- Inbound and Outbound
- Advanced Warehousing
- Standard Manufacturing
- Kanban
- Equipment / Plant Maintenance
- HR and Time Entry
- Field Sales

RFgen Software

LICENSE PLATING

- Currently in use by a number of food manufacturing and lot controlled industries
- Provides for complete tracing of all LP movements
- Permits multiple lots per LP / multiple LPs per lot
- Fully integrated with all inbound and outbound processes
- Compatible with RFgen's load management utility
- Supports SSCC / UCC128 labeling requirements

HIGH AVAILABILITY

- Using a combination of program logic and data replication, all RFgen transactions support 24/7 operations
- Supports casual disconnected states
- Provides real time view of local activities
- Standard in all RFgen transactions
- Assures FIFO processing rules and transaction history
- Automatically returns to real time mode without intervention
